# Introducing AAA Traffic Control

Established in 2003, AAA Traffic Control has grown to become one of the leading traffic control providers in the Construction & Civil Industries, supplying traffic management services to companies across NSW & ACT. Our desire is to fulfil our client's needs by providing a professional, innovative, efficient, safe and competitively priced solution to suite each project. The aforementioned has been the keystone of our growth and success.

At AAA Traffic Control we are able to solve all your traffic management issues, from designing Traffic Control Plans to managing traffic at your worksite. We can guarantee the highest standard of service for all of your projects. AAA Traffic Control is a registered certified contractor with the Roads and Maritime Service.

## Workplace Health & Safety

At AAA Traffic Control the safety of our workers; our client's and the general public is of paramount importance. AAA Traffic Control has the following accreditations:

- ISO 9001 Quality Management Systems (JAS-ANZ Accredited)
- AS/NZS4801 Safety Management Systems (JAS-ANZ Accredited)
- ISO 14001 Environment Management Systems (JAS-ANZ Accredited)

Our key WHS objectives are to:

- Provide a safe workplace for all employees of the company, workers onsite, and members of the public during the course of our activities
- Provide staff with appropriate training in the identification, assessment and control of hazards in the workplace
- Ensure that safety standards are adhered to by all employees
- Consult regularly with employees; clients, and regulating authorities with the aim of improving safety practices.
- Investigate the cause and take corrective action for every incident regardless of whether it has caused injury or not
- Regularly measure and continuously improve our safety performance

Below is an example of our staff wearing Personal Protective Equipment.

# People

We currently employ between 60 to 70 crew members that service our clients 24hrs a day 7 days a week. Our policy is to employ only the most highly skilled people, as such, our minimum requirement is that our traffic controllers must hold a Work Cover NSW Work Health and Safety General Induction card, RMS "Blue" Traffic Controller ticket & RMS "Yellow" Implement Traffic Control Plans ticket. All crew members are required to upgrade to a RMS "Prepare a Work Zone Traffic Management Plan" ticket after one year's experience. As most of our crew members hold this licence, adjustments to Traffic Control Plans can be made onsite and ensuring uninterrupted workflow.

Supporting our controllers behind the scenes is our highly skilled office team who are dedicated to ensuring that projects are delivered on budget, on time and to the highest standard and as such, each member of our office staff have the RMS "Prepare a Work Zone Traffic Management Plan" licence.

# Services

It is our desire to ensure a safe and efficient working environment for your staff. From designing a traffic management plan and organising permits to setting up your site and carrying out traffic control, you can be assured that your work site will be as safe as possible with minimal impact to traffic flow. To do this, we have a system of constant review of safety practices and we use the most up to date technology available to both the construction & civil industries.

Our services include:

- Traffic Management Plans/Traffic Guidance Schemes, Traffic Reports and Construction Traffic Management Plans
- Liaison with Local Council, RMS, Police and State Transit
- Free Site Inspections
- Site Establishment and Onsite Traffic Control
- Special Event Traffic Management
- Equipment Hire - Signs, Bollards, Water Filled Barriers, VMS boards, Day Makers, Portable Traffic Lights, and Trak Mats

*For the peace of mind of our clients, a AAA Traffic Control representative is available 24 hours 7 days a week to respond to your every traffic control need.*
